

Description	Likelihood(1-5)	Impact(1-5)	Risk Rating	Prevention	Response
Not meeting deadline	4	3	6	Take breaks to reduce burnout. Plan in advance using jira. Try not to procrastinate	Understand why the deadline was missed, attempt to get the application out as soon as possible
Network issues	3	2	4	Regularly save and commit work. Go to a place where network issues are minimal	Get to a place with a good connection, use mobile data on hotspot if necessary
Data loss	3	4	6	Regularly save and commit. Keep backups.	
Issue with code	5	3	7	Ask a mentor, or peers when stuck. Google issue and watch videos	Test code, work through it with debugger and ask for help if need be.
PC crashing	2	2	3	Commit regularly that way progress is not lost and is accessible from another location. Have an up to date pc to prevent the crash	Access git from another location. Fix the pc or get a more up to date one.
Getting hacked	1	3	3	Password protect files, have files on a remote location as well as locally. Don't give out private information	Change passwords as soon as possible.

	Insignificant	Negligible	Moderate	High	Critical
Very Likely	5	6	7	8	9
Likely	4	5	6	7	8
Possible	3	4	5	6	7
Unlikely	2	3	4	5	6
Rare	1	2	3	4	5
